SIMPLE AND LONG-LASTING RESTORATION

Rapid filling,
minimal shrinkage stress,
optimal precision

ANTERIOR AND POSTERIOR

Aesthetic precision in **2** mm increments

Proclinic Expert composites are a perfect material
for both anterior and posterior restorations

Dr Lotte Hallander

TandCity ApS, København, Denmark.
www.tandcity.dk

"Handling and manageability of Proclinic Expert Nano Hybrid is very easy and the nano effect provides very good shade matching. I truly recommend this product."

Dr Alexander Johansson

Clinique ZahnCity GmbH, Zurich,
Switzerland.
www.zahncity.ch

"The Proclinic Expert Nano Hybrid composite has optimal viscosity and is easily moulded and shaped. It is very flexible, wear-resistant and has excellent physical strength."

Rapid filling in layers of up to **5** mm thick

The **Proclinic Expert** Bulk Fill composite
is suitable for treating large cavities
in posterior restorations

Opinions of several
consultants from the US-based
dental test institute,
"The Dental Advisor"

"It is ideal for rapid restorations in
posterior teeth without overlays"

"It has a high curing depth and
high strength"

"Great for contouring, finishing
and polishing"

Proclinic Expert Bulk Fill

The fastest restoration

Proclinic Expert Bulk Fill is a light-cured, radiopaque posterior composite capable of treating a maximum thickness of 5mm in 20 seconds.

- 5mm increments can be light-cured in 20 seconds.
- Does not stick to instruments when they are removed.

- Good viscosity, condenses well in posterior restorations.
- It is firm and can be condensed to create better contact points.

Comments from consultants at the institute "The Dental Advisor"

- "Proclinic Expert Bulk Fill has very good handling properties"
- "Proclinic Expert Bulk Fill has a treatment depth of 5mm"
- "Shading for posterior teeth is nonessential and Proclinic Expert Bulk Fill composite is very suitable for particularly large cavities"

% of consultants who:

Proclinic Expert Nano Hybrid

Your ideal anterior/posterior composite

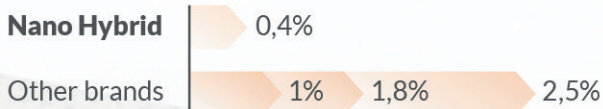

Proclinic Expert Nano Hybrid composite is perfect for both anterior and posterior restorations. It contains a fluorescent pigment that ensures the natural appearance of teeth and is very easy to handle.

COLOUR STABILITY

Proclinic Expert Nano Hybrid is virtually unaffected by accelerated ageing.

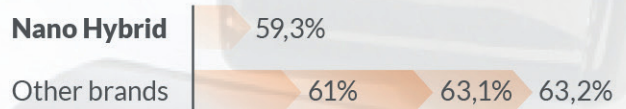

*Change of colour from shade A2 after ageing in transmission mode**

TRANSLUCENCY

Thanks to its translucency, **Proclinic Expert Nano Hybrid** reflects the surrounding tooth structure, guaranteeing an invisible restoration.

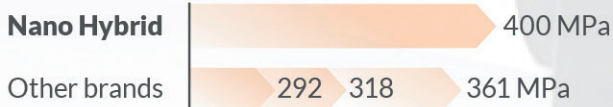

*Opacity**

COMPRESSIVE STRENGTH

The high compressive strength of **Proclinic Expert Nano Hybrid** helps it withstand chewing forces, increasing its life expectancy.

*Strength**

Other nanohybrid composites

Proclinic Expert Nano Hybrid

* Results of testing by the manufacturer comparing the product with the three most popular brands available on the Spanish market.

Proclinic Expert Nano Flow

Your most versatile composite

Proclinic Expert Nano Flow is indicated for almost all types of restorations. It is radiopaque and guarantees the natural appearance of teeth. It contains nanofillers that improve polishing properties, wear resistance and compressive strength, and UDMA resins that reduce viscosity and minimise post-operative sensitivity.

COMPRESSIVE STRENGTH

The high compressive strength of **Proclinic Expert Nano Flow** means it has a wider range of application possibilities.

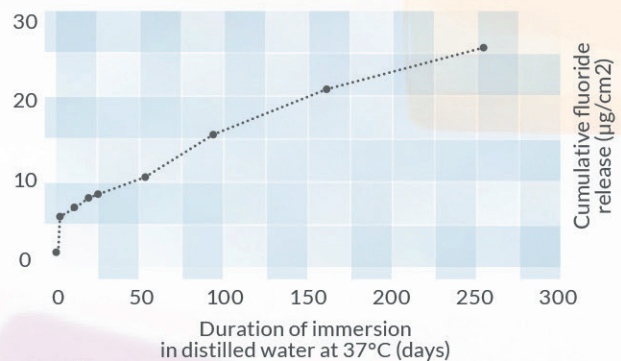

MPa at 1 hour*

FILLER LOADING

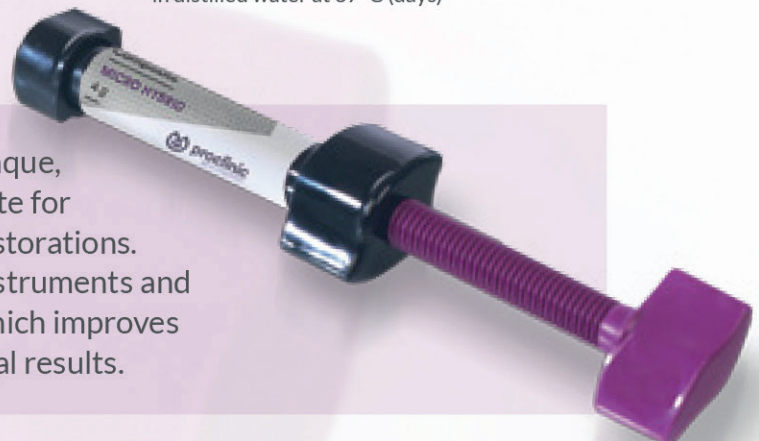

The high filler loading of **Proclinic Expert Nano Flow**, 64% by weight, lends it an excellent wear resistance.

FLUORIDE RELEASE

Proclinic Expert Micro Hybrid

A light-cured, radiopaque, microhybrid composite for anterior/posterior restorations. It does not stick to instruments and has low shrinkage, which improves application and clinical results.

Clinical tests provide evidence of the quality of Proclinic Expert composites

Proclinic Expert composites have successfully passed all clinical tests performed by the research team led by Professors María Jesús Suárez García and José Carlos de la Macorra García at the Universidad Complutense de Madrid (Spain).

EVALUATION OF DOCTORS TAKING PART IN THE STUDY:

"The microhybrid composite is very easy to handle and preserves its shade of colour well"

Dr Beatriz Vizoso Noval

"This flowable composite offers precise handling. It has no apparent disadvantages compared to other brands I usually use"

Dr Carlos López Suárez
